Education

Expected in July 2027

Bachelors In Computer Science in Computer Science

Universidade De Coimbra at Coimbra, Portugal

- Member of Pollux Space, February 2025 - Present

About Me

I am a young Computer Engineering student who took the initiative to learn more about programming by stepping outside the comfort zone of the university curriculum. Instead of focusing intensively on the more engineering-oriented courses, I chose to develop my own projects and acquire the skills I need to become a valuable team member and solve the problems that need to be addressed.
